

DOW IN EDINA

Edina is a key component of Dow Water & Process Solutions' global business strategy, and a significant contributor to The Dow Chemical Company's corporate growth and profitability.

We've been in Edina for more than 30 years. Our first success was in 1978, with the invention of the first DOW™ FILMTEC™ membrane. In 1985, Dow Water & Process Solutions was formed when The Dow Chemical Company acquired FilmTec Corporation. Dow's Edina Operations have experienced an unprecedented and exciting expansion. Sales, manufacturing sites, offices and employee numbers have all increased exponentially during our time in the community.

Dow Water & Process Solutions believes that the health of its business is intertwined with the health of the communities in which it operates. Our business actively supports the social and economic aspirations of these communities and enables their success by forging alliances with non-profit organizations through educational programs, training and charitable contributions.

In Edina, Dow Water & Process Solutions uses its unparalleled expertise and influence to support groups such as Habitat for Humanity, Ronald McDonald House Charities, Connecting with Kids and Special Olympics; sponsor educational programs and events to stimulate interest in science and technology, including The Works, Project Earth Outdoors, and Young Scientists Roundtable; and offer assistance to those who help make our community a better place to live, such as Edina Community Foundation, Edina Education Fund, Edina Crime Prevention Fund, Edina Fire Department and Edina Police Department.
