

Ravi Ramanathan
Vice President of Business and Geographic Development
Dow Kokam

"Success in vehicle electrification will be won by those with the vision and ability to relentlessly invest in advancing battery performance and never take their eye off development of the next innovation to meet their customers' needs. This laser focus on innovation is exactly what Dow Kokam was created upon."

– Ravi Ramanathan

Ravi Ramanathan is Vice President of Business and Geographic Development for Dow Kokam, with responsibility for strategy and business development in vehicle electrification. He also works with the US government to ensure ongoing support for advanced battery research and development.

Previously, Ramanathan served as Director of Global Business Development for Dow Automotive Systems, a business unit of The Dow Chemical Company (Dow), where he initiated and led Dow's entry strategy across key segments of the energy storage value chain, including the formation of Dow Kokam. He originally joined Dow in 1989 and held several positions in advanced research, manufacturing and product development.

Ramanathan holds a Ph.D. in Chemical Engineering from the University of Louisville in Kentucky, and completed his post-doctoral work at Virginia Polytechnic Institute and State University.
