

## **Attention: Accounts Receivable**

Dear Valued Supplier Representative,

On August 31, 2017, we successfully completed a merger of equals between The Dow Chemical Company and E.I. du Pont de Nemours and Company. The merger resulted in Dow and DuPont becoming subsidiaries of DowDuPont, Inc. DowDuPont is now pursuing the intended separation of the Company's Agriculture, Materials Science and Specialty Products divisions into three independent, publicly traded companies. The intended division separations, which are subject to Board approval, are expected to occur in 2019. Materials Science is expected to separate by April 1, 2019, and Agriculture and Specialty Products are expected to separate from one another by June 1, 2019.

In support of the intended division separations, a new Enterprise Resource Planning (ERP) platform was created for the Agriculture Division. The separation of the ERP environment will result in a change to the functional mailbox you use to send electronic invoices to for the Agriculture Division legal entity in Mexico. Our records indicate your company is submitting electronic invoice PDF and XML files to [FACTURA70@dow.com](mailto:FACTURA70@dow.com) for Dow AgroSciences de Mexico S.A. de C.V. and this functional mailbox is impacted by this change.

### **What action do we require from you?**

Starting November 15, 2018, please send all electronic invoice PDF and XML files for Dow AgroSciences de Mexico S.A. de C.V. to [FMZFAC5@pioneer.com](mailto:FMZFAC5@pioneer.com) for payment processing. Failure to send electronic invoices impacted by this change to [FMZFAC5@pioneer.com](mailto:FMZFAC5@pioneer.com) will result in the invoice not being received or paid. Please update your system to assure electronic invoices are directed to the correct functional mailbox.

We appreciate your cooperation to ensure minimal impact to you and your business. If you have any questions, please contact your Sourcing representative or use the [Contact Us form](#) on the Supplier website.

Sincerely,

**The Dow Chemical Company**
