

GOLD MEDAL FOR A MORE SUSTAINABLE AGRICULTURE: MORE PRODUCTIVITY AND LOWER ENVIRONMENTAL IMPACT

• Sustainable Agriculture Project: implemented in partnership with an international company

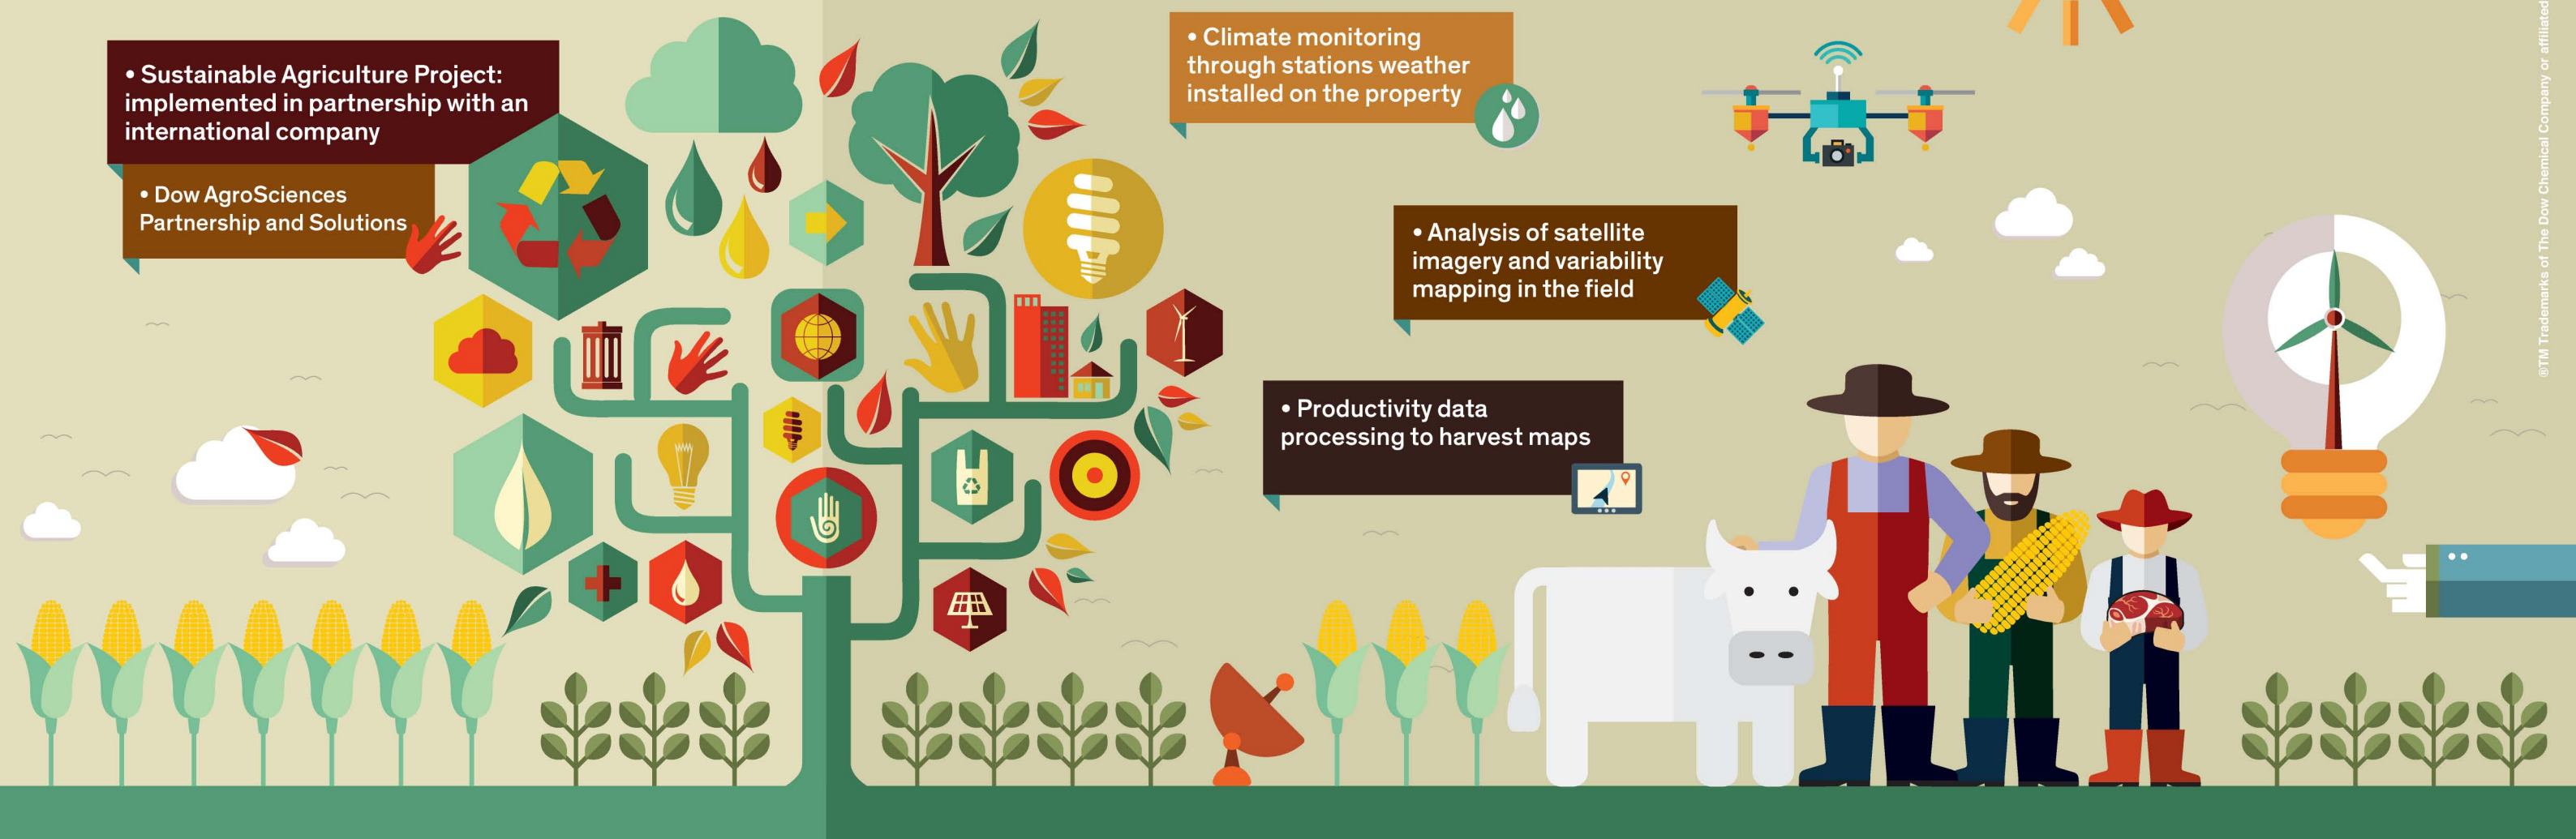

• Dow AgroSciences Partnership and Solutions

• Precision Farming: more productivity and optimization of resources and energy

• Climate monitoring through stations weather installed on the property

• Analysis of satellite imagery and variability mapping in the field

• Productivity data processing to harvest maps

©TM Trademarks of The Dow Chemical Company or affiliated companies.

Dow is the chemical company and official carbon partner of the Rio 2016 Olympic Games. That means commitment to greenhouse gas reduction in Brazil and in Latin America to assist the Organizing Committee to achieve sustainability goals. Through technology and innovation, the Sustainable Agriculture program is responsible for promoting a significant part of this reduction, once it is aligned with the Dow AgroSciences strategy of increasing productivity through science and education, in order to build a better future for all.
