

## Dow Industrial Solutions

# Solutions for Surface Cleaners pH Neutralizers

Dow is the world's largest producer of ethanolamines, and a market leader in isopropanolamines. These products can offer differentiation to cleaning formulations by providing stable pH control and good anti-deposition properties.

- Formulations with DIPA & MIPA: good cleaning with minimal filming and streaking
- Adding NaOH is great for cleaning but it leaves residues and may add dermal irritation issues to formulations.

### Benefits of Using Dow Amines

- pH Control
- Fatty acids neutralization
- Control of film formation
- Effective soil anti-deposition agents
- Anti-deposition effect

### Performance Trials: Evaluation of Neutralizers in Surface Cleaners
