

Subject: Substances of Very High Concern Inquiry (REACH SVHC)

In our continuous efforts to provide you with information about REACH, we wish to inform you that a list of chemicals being considered as candidates for SVHC classification under REACH regulations has been posted by the European Chemicals Agency (ECHA) and can be found at:

<https://echa.europa.eu/candidate-list-table>

Page | 1 of 1

As of the date of this communication, according to ECHA communications, there are currently 224 substances on the REACH Candidate List. The Candidate List was last updated on 10.06.2022.

The main means of communication is our EU Safety Data Sheet (SDS), in section 3 and 15 the relevant information is listed. If a SVHC component is not shown, this means a SVHC component is not expected to be present in the product above the reporting threshold of 0.1 wt%. You can download the majority of our EU SDS via the link to our SDS Finder for self-service: [SDS Finder - Dow Safety Data Sheets | Dow Inc.](#)

The products listed in the product list (link below) contain a substance which is either on the Candidate List of substances of very high concern or recommended for inclusion in Annex XIV:

[Link to Product List](#)

With the exception of these products, and with the exception of products containing D4 (CAS 556-67-2), D5 (CAS 541-02-6), and D6 (CAS 540-97-6) above 0.1%, to the best of Dow's knowledge and belief, Dow Silicones' products do not contain any of the substances which are on the candidate list of substances of very high concern or recommended for inclusion in Annex XIV at the time of our supply to your company above the reporting threshold of 0.1%.

We are unaware of any potential sources for the introduction of any substances of concern from the manufacturing and packaging processes utilized, nor from the packaging components themselves. However, Dow does not specifically analyze for the presence of substances of very high concern.

Sincerely,

Dow Silicones REACH Team
