

PUT LOW GLOBAL WARMING POTENTIAL SOLUTIONS IN GEAR

Dow Polyurethane Solutions are in Development to Meet EPA Proposed Blowing Agent Regulations and Help You Get Ahead

To make a smooth and seamless shift to a low global warming potential (GWP) solution in refrigerated trailer applications, get hooked up with our:

- **Game-changing Science:** New high-performance foam systems based on a decade of low-GWP blowing agent research
- **Expert Collaboration:** Dedicated teams work closely with you to develop light-weight, energy-efficient solutions
- **Exceptional Service:** Dow is ready to work through your specific requirements to ensure a smooth transition of operations within a manageable timeline and keep you delivering the performance your customers expect

- **Advocacy:** On behalf of the entire industry, Dow is advocating to the EPA to extend the timeline for the proposed Significant New Alternatives Policy (SNAP) rules

INNOVATION
FOCUSED ON YOU

Committed to the Transportation Industry

Contact Dow to learn more about our next generation high-performance solutions that address the unique technical challenges of the EPA's proposed blowing agent regulations and keep your business in high gear.
