Coaster

This shape was molded as a promotional item for customer visits. The disc is 68 mm (2.67 inches) in diameter and 3 mm (0.12 inches) thick in the center area. This mold is highly polished so it has a good optical surface and can be used for optical testing. The writing around the perimeter was etched in approximately 0.002” deep and shows how well surface finishes can be reproduced.

Points to note:

• The optical grade, high-polish finish (SPI A-1) at center of part.
• There is fine detail in writing on the edge.
