Light pipes

The light pipes are best used for a simple light guide. They are Ø 5 mm x 50 mm and Ø 10 mm x 50 mm (Ø 0.2 inches x 2 inches and Ø 0.4 inches x 2 inches) with highly polished sides and ends. They are molded at the same time in the same mold with equally sized runners and gates. There is no need to balance mold flow here.

**Points to note:**

- The light pipes can bend light.
- Demonstrate with a laser or flashlight without cap.
- When two parts are pressed together, the surfaces will provide some optical coupling.
