

High quality solvents for API manufacturing

Processing aids with the quality and reliability the industry demands

Dow offers a range of solvents to address the needs of the highly regulated pharmaceutical industry.

- With Dow's global sourcing, all of your manufacturing locations can receive the same high quality product with every order.
- Selected products are manufactured to Current Good Manufacturing Practices (cGMP), and meet additional requirements from the appropriate governing bodies.
- Industrial grades are also available with impurities disclosed upon request.

Product	Compliance	Key physical properties	Benefits
Phenoxyethanol / DOWANOL™ EPh NF	NF	CAS: 122-99-6 Boiling point: 244°C Flash point: 121°C Solubility in water: 2.5 wt%	<ul style="list-style-type: none"> • Slow evaporation • High solvency
Isopropyl Alcohol / Isopropanol Anhydrous USP/EP	USP, EP	CAS: 67-63-0 Boiling point: 82.3°C Flash point: 12°C Solubility in water: ∞	<ul style="list-style-type: none"> • Fast evaporating • Good solvency • Low density
Propionic acid FCC	FCC	CAS: 79-09-4 Boiling point: 140.8°C Flash point: 52°C Solubility in water: ∞	<ul style="list-style-type: none"> • Approved for human consumption • Various grades to meet regulatory standards
Valeric acid ultrapure	Detailed impurity profile available.	CAS: 109-52-4 Boiling point: 185.5°C Flash point: 84°C Solubility in water: 2.4 wt%	<ul style="list-style-type: none"> • Reduced impurities compared to industrial grade

These are typical properties, not to be construed as specifications.

Re-imagine how you work with your solvent supplier

- Maintain low impurity levels throughout processing by sourcing your solvents from Dow.
- Need to have trace impurities identified? Talk with a member of Dow's technical team today.

NF = National Formulary
USP = United States Pharmacopeia
EP = European Pharmacopeia
FCC = Food Chemical Codex

Other industrial solvents available

Common names	CAS #
Diethanolamine, DEA	111-42-2
Diisopropanolamine, DIPA	110-97-4
CARBITOL™ Solvent, Diethylene Glycol Monoethyl Ether, Ethoxydiglycol	111-90-0
Ethylenediamine, EDA	107-15-3
Isobutyl alcohol, Isobutanol	78-83-1
Monoethanolamine, MEA	141-43-5
Triethanolamine, TEA, Trolamine	102-71-6

Innovation

Dow is committed to collaborating with customers to innovate in the Life Sciences market.

Partner with us today to design your novel product using Dow's high quality analytical and synthesis capabilities.

High throughput research (HTR)

HTR integrates work flows from chemistry, engineering, analytics, robotics, and more to help deliver solutions faster.

Utilize HTR to determine which formulations maximize drug solubility.

Regulatory & technical support

Dow has decades of experience in the pharmaceutical industry, collaborating with some of the world's largest companies.

We have regulatory and technical support in nearly every region of the world.
