DOWSIL™ ES-5300 Formulation Aid

FEATURES & BENEFITS
- Silicone W/O and W/Si emulsifier
- Low odor
- Non-diluted emulsifier
- Low viscosity
- Oil-phase flexibility
- Provide stable cream and milky emulsions by low addition level and common mixers
- Light sensory
- Typical applications
  - Pigment and fine particle dispersant
  - Liquid & cream foundation
  - Sun care
  - Skin cream and milky lotion

INCI Name: Lauryl PEG-10 Tris(trimethylsiloxy)silylethyl Dimethicone

APPLICATIONS
- Silicone emulsifier designed to create low viscosity Water-in-Oil emulsions.
- Oil phase flexibility for the emulsification of silicone and organic oils and their mixture.
- Can be used in wide range of personal care applications such as:
  - Color cosmetics (example: Liquid & Cream foundation)
  - Skin care
  - Sun care
  - Hair care
  - Antiperspirants and Deodorants

DESCRIPTION
DOWSIL™ ES-5300 Formulation Aid is a non-diluted and low viscosity silicone surfactant.

Designed to produce stable water-in-silicone emulsions and water-in-oil emulsions with light sensory.

DOWSIL ES-5300 Formulation Aid improves the dispersibility of pigment and fine particle in silicone fluid and organic oil.

HOW TO USE
The recommended addition level of DOWSIL ES-5300 Formulation Aid is 2% for emulsions with a high level of water phase. Decreasing the water phase level will require increasing the emulsifier addition level. Thanks to its broad compatibility with silicone and organic oils and low viscosity, DOWSIL ES 5300 Formulation Aid is easily dispersed in the oil phase prior the addition of the water phase.
Water phase should be added slowly into the oil phase containing DOWSIL ES-5300 Formulation Aid using a variety of common mixers.

High shear mixing at the end of the emulsification process helps to decrease the particle size.

**HANDLING PRECAUTIONS**

PRODUCT SAFETY INFORMATION REQUIRED FOR SAFE USE IS NOT INCLUDED IN THIS DOCUMENT. BEFORE HANDLING, READ PRODUCT AND SAFETY DATA SHEETS AND CONTAINER LABELS FOR SAFE USE, PHYSICAL AND HEALTH HAZARD INFORMATION. THE SAFETY DATA SHEET IS AVAILABLE ON THE DOW WEBSITE AT WWW.CONSUMER.DOW.COM, OR FROM YOUR DOW SALES APPLICATION ENGINEER, OR DISTRIBUTOR, OR BY CALLING DOW CUSTOMER SERVICE.

**USABLE LIFE AND STORAGE**

When stored at or below 40°C in the unopened original containers, this product has a usable life of 540 days from the date of production.

When stored below 10°C for more than a week, the material might develop a slight haze. If stored for longer (typically more than 4 months) at that temperature, an additional slight separation could also be observed. By heating the material to 40°C and applying a gentle agitation, the material will return to its original transparent appearance.

**PACKAGING INFORMATION**

18 kg Pails
500 g Sample

**LIMITATIONS**

This product is neither tested nor represented as suitable for medical or pharmaceutical uses.

**HEALTH AND ENVIRONMENTAL INFORMATION**

To support customers in their product safety needs, Dow has an extensive Product Stewardship organization and a team of product safety and regulatory compliance specialists available in each area.

For further information, please see our website, www.consumer.dow.com or consult your local Dow representative.

**LIMITED WARRANTY INFORMATION – PLEASE READ CAREFULLY**

The information contained herein is offered in good faith and is believed to be accurate. However, because conditions and methods of use of our products are beyond our control, this information should not be used in substitution for customer’s tests to ensure that our products are safe, effective, and fully satisfactory for the intended end use. Suggestions of use shall not be taken as inducements to infringe any patent.

Dow’s sole warranty is that our products will meet the sales specifications in effect at the time of shipment.

Your exclusive remedy for breach of such warranty is limited to refund of purchase price or replacement of any product shown to be other than as warranted.

TO THE FULLEST EXTENT PERMITTED BY APPLICABLE LAW, DOW SPECIFICALLY DISCLAIMS ANY OTHER EXPRESS OR IMPLIED WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE OR MERCHANTABILITY.

Graph 1: Viscosity of W/Si+O emulsions made by DOWSIL ES-5300 Formulation Aid.

The viscosity was checked just after emulsification and one month stored at 40 degree C, room temperature and -5 degree C. Ratio of water/dimethicone (5cs)/organic oil / DOWSIL ES-5300 Formulation Aid = 80/8/10/2. Abbreviations: IOTG = Triethylhexanoin; CIO = Cethyl Ethylhexanoate; ID = Isododecane; MO = Mineral oil.

DOWSIL ES-5300 Formulation Aid keeps stability of various oil phase emulsions under different storage conditions.
